## Technical Skills

---

|                   |                                                                            |
|-------------------|----------------------------------------------------------------------------|
| <b>Languages</b>  | Java • C/C++/C# • Python • HTML/CSS • TypeScript • Assembly • SQL • MATLAB |
| <b>Tools</b>      | VS Code • Git • GCC/GDB • GitHub Pages • Valgrind • Perf                   |
| <b>Frameworks</b> | NextJS/Vite • Tailwind • .NET • MonoGame • PyGame                          |

## Projects

---

### Personal Projects

#### Image Editing Software (Java)

(October 2021 - January 2022)

- Developed a terminal-based image editing program that allows users to apply various transformations to an image through the command-line.
- Implemented functionality for loading and saving images, gaining hands-on experience with Java's File I/O libraries.
- Designed and implemented basic colour filters and image modifiers, acquiring knowledge into Java's Graphics libraries.

### Academic Projects

#### Territory Ascent (Python, PyGame, PyInstaller)

(February 2025 - April 2025)

Data Communications and Networking (CMPT 371), SFU

- Developed both client and server for a LAN game using PyGame and TCP sockets, managing connections, disconnects, and game state.
- Implemented the game loop and message handling, sending and receiving data packets using Msgpack for efficient communication.
- Collaborated in a team of four, integrating features and ensuring reliable multiplayer functionality.

#### Love At First Paw (JS/HTML/CSS, NodeJS/Tailwind, Vercel)

(February 2025 - April 2025)

Introduction to Software Engineering (CMPT 276), SFU

- Spearheaded project as Project Manager, creating reports, dividing work among team members using Agile Kanban methodologies, and coordinating development efforts.
- Developed major backend features and API integrations, including Petfinder and Mapbox APIs.
- Collaborated in a team of four to design and implement the website, currently deprecated due to Petfinder API discontinuation.

#### Personal Website (JS/HTML/CSS, Vite, Github Pages)

(February 2025 - Present)

Introduction to Software Engineering (CMPT 276), SFU

- Designed and developed a personal portfolio website initially using React, later migrated to Vite to address security vulnerabilities and improve build performance.
- Utilized React Router to implement smooth navigation between different sections, providing users with a seamless browsing experience.
- Integrated Web3Forms to handle form submissions and email notifications, facilitating the contact process without the need for server-side code.

## Work Experience

---

### Line Cook/Prep Cook

(May 2021 - Present)

Artful Dodger Pub, Langley, B.C

- Expressed exceptional teamwork skills in a fast-paced environment, ensuring smooth communication between coworkers to deliver exceptional products.
- Trained and mentored new hiring recruits in operational procedures, kitchen safety, and food preparation techniques.
- Adapted quickly and efficiently to new menu items and cooking methods.

## Education

---

### BSc. Computing Science

(September 2023 - Present)

Simon Fraser University, B.C
